

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant :	HORMIGO, et al.	Art Unit :	2616
Serial No. :	10/564,949	Examiner :	Unknown
Filed :	17 January 2006		
Title :	METHOD AND SYSTEM FOR DETECTING THE PRESENCE OF A MOBILE TERMINAL		

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

REQUEST FOR CORRECTED FILING RECEIPT

Applicants respectfully request that the title be corrected from "METHOD AND SYSTEM FOR DETECTING THE PRESENCE OF A MOBLIE TERMINAL" to:

**--METHOD AND SYSTEM FOR DETECTING THE PRESENCE OF A MOBILE
TERMINAL--**

Enclosed please find a copy of the first page of the Specification as filed on 17 January 2006 along with a copy of the Certificate of Mailing by Express Mail, both of which includes the correct application title. Also enclosed, please find a marked-up copy of the filing receipt with the requested change in ink. Applicants therefore request that a Corrected Filing Receipt be issued to reflect this change.

It is believed this error occurred through the fault of the U.S. Patent Office and that no fee is believed to be due. However, please apply any charges or credits to Deposit Account No. 50-2324.

Respectfully submitted,

Date: 10 July 2007

FILING RECEIPT

OC000000019110103

Date Mailed: 06/07/2006

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).**

Method and system for detecting the presence of a ~~mobile~~ terminal
mobile

Preliminary Class

370

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER Title 35, United States Code, Section 184 Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

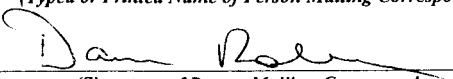

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Method and system for detecting the presence of a
mobile terminal

5 The field of the invention is that of mobile
telecommunication networks. In a mobile
telecommunication network, such as the cellular
networks of the GSM, GPRS, UMTS types, the users are
able to travel with a mobile terminal across all the
10 territory covered by a network to which they have
subscribed, even covered by other compatible mobile
telecommunication networks, this is called roaming,
while retaining their ability to communicate with the
mobile telecommunication network and, through it, with
15 the outside for services or applications of the
telephony type or other data-type applications.

A user may also temporarily leave the coverage of the
mobile telecommunication networks, whether his terminal
20 is switched off intentionally or, unintentionally
because the battery has run out. In this case, the user
no longer has access to the functions of the network
and, reciprocally, he cannot be reached by other
persons or by applications.

25 The term "mobile subscriber" used in this text is the
term used in the GSM/GPRS/UMTS standards of the 3GPP
and refers to a subscription taken out with a mobile
operator which provides access to its mobile
30 telecommunication network. This subscription is
identified by the International Mobile Subscriber
Identity (IMSI) or the Mobile Station Integrated
Services Digital Network number (MSISDN). The IMSI is
usually stored in a SIM (Subscriber Identity Module)
35 card which, inside the mobile terminal, links the
operation thereof to the identified subscription. The
MSISDN does not have to be stored in the SIM card to
identify the subscription; the latter may be identified
based on a match between MSISDN and IMSI in the core
